DFP13 Underground Fire Hydrant Boiler

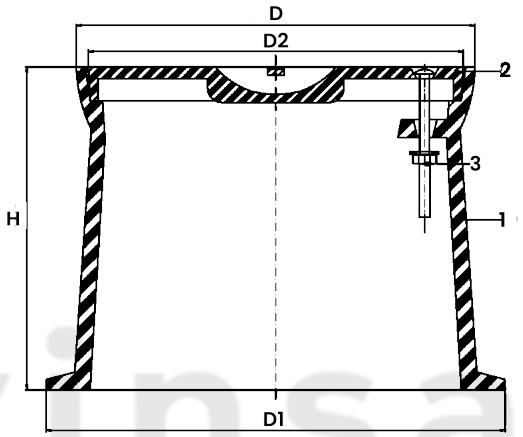

DFP13 Underground Fire Hydrant Boiler is designed to provide reliable water supply and control for underground fire hydrant systems. Its robust construction ensures durability and dependable performance under high pressure and harsh environmental conditions.

Manufactured from corrosion-resistant, durable materials, DFP13 units offer long service life, tight sealing, and minimal maintenance. Easy to install and operate, they are ideal for municipal, industrial, and commercial fire protection applications.

Areas of Application

Water and wastewater systems
Chemical industry
Food and beverage industry
Pharmaceutical production
Oil and gas pipelines
HVAC systems

Material Specifications

Nu	Part Name	Material
1	Body	EN-GJS-400-15 (GGG40)
2	Bonnet	EN-GJS-400-15 (GGG40)
3	Bolts & Nuts	8.8 Galvanized

Dimensions
