HEAT BLOCK

Size: ± 4 x 6 m / 13 x 19.8 ft. | Handled by:

1 Roll out the Heat Block Fire Blanket

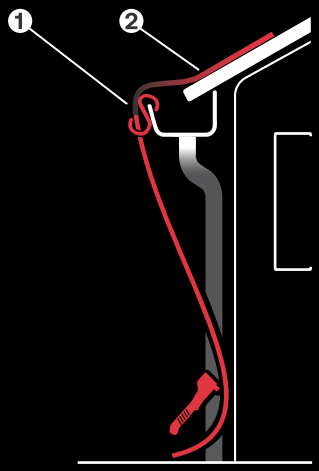

Unpack and roll out the Heat Block fire blanket toward the area you want to protect.

Make sure the **reflective side is facing outward.**

2 Attach the Heat Block Fire Blanket to the roof

1. Use carabiners to fasten the fire blanket to gutters or battens
2. Staple the top edge of the blanket to the roof surface or gable boards

3 Secure the Heat Block Fire Blanket

Use additional attachment points to keep the fire blanket in place and prevent it from lifting in the wind.

IMPORTANT NOTICE

- This is a radiant heat protection blanket.
- Blocks 96% of radiant heat.
- Shields against flying embers.
- Not designed for direct flame exposure over time.
- Practice the installation before mounting and ensure all required tools are ready to use.

TOOLS REQUIRED

- 1 pc. Heat Block Fire Blanket
- 6 pcs. Carabiners
