DCT10 Pressure Reducing Control Valve

DCT10 Pressure Reducing Control Valves are designed to reduce and regulate high inlet pressure to a stable, lower downstream pressure in water, wastewater, and industrial pipeline systems. They maintain constant outlet pressure despite fluctuations, ensuring safe and efficient operation.

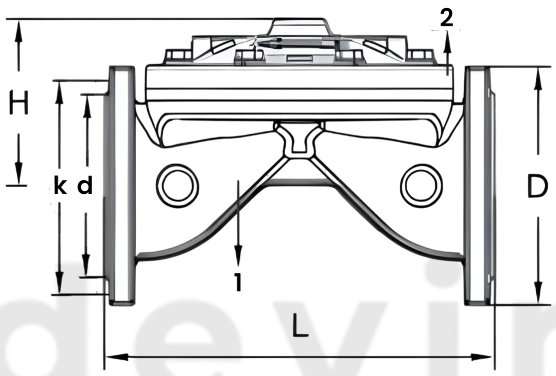

Made from durable, corrosion-resistant materials, DCT10 valves offer long service life, reliable performance, and low maintenance. Compact and easy to install, they are ideal for applications requiring dependable pressure control.

Areas of Application

Water and wastewater systems
Chemical industry
Food and beverage industry
Pharmaceutical production
Oil and gas pipelines
HVAC systems

Optional

Y Type
Globe Type
Threaded

Material Specifications

Nu	Part Name	Material
1	Body	EN-GJS-400-15 (GGG40)
2	Bonnet	EN-GJS-400-15 (GGG40)
