DCT23 Flow Control Valve

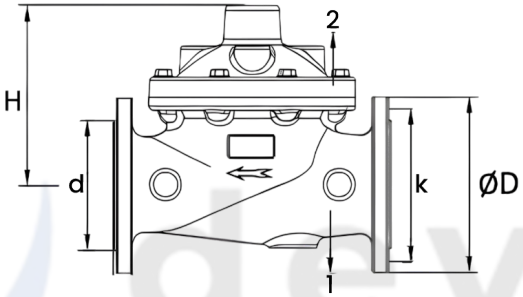

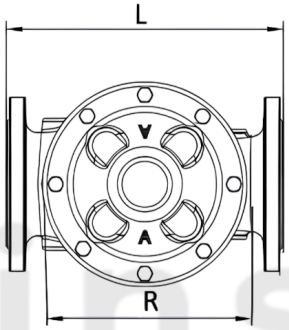

DCT23 Flow Control Valves are designed to maintain a consistent flow rate in water, wastewater, and industrial pipeline systems. By regulating flow automatically, they help ensure stable operation and protect downstream equipment.

Made from durable, corrosion-resistant materials, DCT23 valves offer long service life, reliable performance, and minimal maintenance. Compact and easy to install, they are ideal for applications requiring precise and dependable flow control.

Areas of Application

Water and wastewater systems
Chemical industry
Food and beverage industry
Pharmaceutical production
Oil and gas pipelines
HVAC systems

Material Specifications

Nu	Part Name	Material
1	Body	EN-GJS-400-15 (GGG40)
2	Bonnet	EN-GJS-400-15 (GGG40)
