DCT12 Pressure Relief Control Valve

DCT12 Pressure Relief Control Valves are designed to protect pipeline systems by automatically releasing excess pressure. They maintain safe operating conditions in water, wastewater, and industrial applications, preventing potential damage to pipelines and equipment.

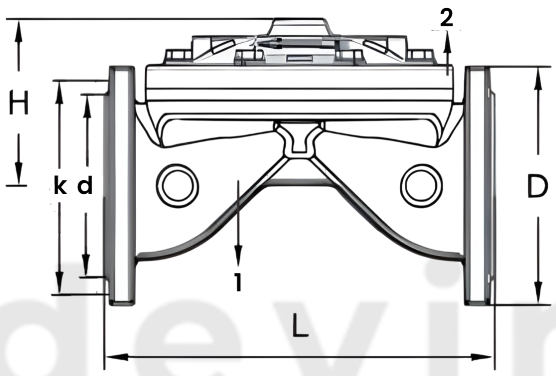

Constructed from durable, corrosion-resistant materials, DCT12 valves provide long service life, reliable performance, and low maintenance. Compact and easy to install, they are ideal for applications requiring dependable system protection against pressure surges.

Areas of Application

Water and wastewater systems
Chemical industry
Food and beverage industry
Pharmaceutical production
Oil and gas pipelines
HVAC systems

Optional

Y Type
Globe Type
Threaded

Material Specifications

Nu	Part Name	Material
1	Body	EN-GJS-400-15 (GGG40)
2	Bonnet	EN-GJS-400-15 (GGG40)
